

Beyond Chemicals: Expert-Driven Sanitation & Chemical Solutions for Food Processors' Success

For over 30 years, a leading pork processing facility has relied on ProActive Solutions USA, LLC to provide the chemical expertise needed to maintain the highest sanitation standards. Unlike traditional service providers, ProActive isn't just a supplier—they are a trusted partner in keeping operations running smoothly.

The plant manager at the facility emphasized the strength of this relationship:

*"ProActive has always been there for us. We've worked together to solve problems, whether it's navigating USDA regulations, optimizing our sanitation program, or responding quickly when we need product on-site. **They don't just sell us chemicals**—they work with us to make sure we have the right solutions for our plant."*

One key challenge the facility faced was implementing new chemistry to improve sanitation processes while meeting strict industry regulations. The plant manager recalled how ProActive played a vital role:

*"We knew we were in the right, but regulatory hurdles made it a battle. **ProActive stuck with us**, helping us present our case and ensure we had the best possible solution for our facility."*

Beyond compliance, ProActive's fast response times have also been crucial. When an unexpected chemical spill occurred, the facility needed a solution immediately. The plant manager explained:

*"I told them I need product here today—and they found a way to get it to us right away. **That kind of service makes a difference.**"*

For this processing plant, ProActive Solutions isn't just a vendor—they are **an essential part of the operation**, ensuring that the plant stays clean, compliant, and efficient with the right chemical solutions and expert support.

“

THEY DON'T JUST SELL US CHEMICALS—THEY WORK WITH US TO MAKE SURE WE HAVE THE RIGHT SOLUTIONS FOR OUR PLANT."
